-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/11/2007 has been entered.

Claims 16, 18, 19, and 22 – 25 are pending.

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 16, 18, 19, 22 – 29 **remain** rejected under 35 U.S.C. 103(a) as being unpatentable over Woolfe in view of Ouadji for reasons of record and those discussed below. In addition, newly added claims 30 – 35 are now included in this rejection.

Newly added claims 30 – 32 recite a method of treating arthritis by administering the composition of claim 22. Woolfe teaches treatment of arthritis in paragraph [0002]. Claims 33 – 35 require additional materials, such as acrylate polymers and modified celluloses. The use of these materials is taught in Example 1 of Woolfe.

### ***Response to Arguments***

Applicant's arguments filed 4/11/2007 have been fully considered but they are not persuasive. Applicants' argue that the declarations are sufficient to overcome the

Art Unit: 1615

rejections by showing unexpected results over the prior art. There are two declarations, one by Michel Franz (the Franz declaration), which purports to show the difference in stability of misoprostol in gelatin capsules versus in HPMC capsules, and the other by Karin Amighi (the Amighi declaration) indicates that the presence of an additional drug or drug bead (with excipients) in the capsule would not effect the stability of misoprostol. The Franz declaration is deficient because the type of gelatin used in the study is not specified. The art specifically refers to "hard gelatin" capsules. Other types of gelatin capsules, for example, soft gelatin, are also available for use in the pharmaceutical arts. For the Franz declaration to be sufficient, it is necessary the evidence provided therein be a true comparison with the hard gelatin of the art. However, it is not clear from the Franz declaration whether hard or soft gelatin was used.

### ***Conclusion***
